

ROSHAN TRIVEDI CIAM

Cyber Security & IAM/PAM Enthusiast | Identity & Privileged Access Architecture | Zero Trust

Bengaluru, Karnataka, India • trivedi.roshan1@gmail.com • +91 9740870946

roshantrivedi.co.in • linkedin.com/in/roshan-trivedi-ciam-49413a54 • github.com/trivediroshan1-ui

Cyber Security professional and IAM/PAM enthusiast with 12+ years designing, implementing, and governing Identity & Access Management and Privileged Access Management programs for global enterprises. Currently leading Identity & Privileged Access Security at Cargill, setting architecture strategy and governance standards across hybrid and cloud environments. Deep hands-on expertise across CyberArk, BeyondTrust, and SailPoint, spanning banking, fintech, and enterprise clients in India and Australia. Publishes independent Zero Trust security research, including a national-scale reference architecture to secure India's examination system.

CORE COMPETENCIES

- Privileged Access Management (PAM) Strategy & Architecture
- Identity & Access Management (IAM) Governance
- Non-Human Identity (NHI) & Machine Identity Governance
- Zero Trust / Zero Standing Privilege (ZSP) Design
- AI Governance & AI-Driven Identity Security
- Security Control Mapping & Compliance (NIST, ISO 27001, SOX)
- Identity Governance & Administration (IGA)
- Cloud Identity Security (AWS, Azure, Entra ID)
- Cloud Security Posture Management (CNAPP)
- Audit Readiness, Access Governance & Risk Reduction

TECHNOLOGY STACK

Privileged Access Management (PAM): CyberArk (Privileged Cloud/ISPSS, EPM, SIA, SWS), BeyondTrust (Password Safe), Delinea

Identity Governance & Administration (IGA): SailPoint (IdentityIQ, Identity Security Cloud), Saviynt

Non-Human Identity (NHI) Security: Clutch Security

Cloud & Cloud-Native Security: AWS, Microsoft Entra ID, Wiz (CNAPP)

CERTIFICATIONS

- SailPoint Identity Security Leader Credential — Jun 2025
- Certified Identity and Access Manager (CIAM), IMI — Sep 2024
- BeyondTrust Certified Administrator: Password Safe — Sep 2024
- CyberArk Certified Delivery Engineer - CPC — Apr 2025
- CyberArk Certified Delivery Engineer - PAM — Feb 2025
- CyberArk Sentry PAM — Feb 2023
- CyberArk Defender PAM — Feb 2023
- CyberArk Defender - Endpoint Privilege Manager — Feb 2024
- CyberArk Certified Delivery Engineer - EPM — May 2024
- AWS Certified Solutions Architect - Associate — Feb 2019

PROFESSIONAL EXPERIENCE

Senior Consultant — Identity & Privileged Access Security — Cargill

Nov 2025 - Present

India - Hybrid

- Lead enterprise privileged access security programs, defining architecture strategy, operating models, and governance standards to reduce privileged risk and improve identity security maturity.
- Design and implement scalable PAM frameworks enabling secure credential management, session monitoring, and controlled administrative access across critical enterprise systems.
- Establish lifecycle governance for privileged identities — onboarding standards, approval workflows, access reviews, and audit reporting.

- Improved privileged access governance and onboarding coverage across critical systems, strengthening audit readiness and reducing unmanaged privileged accounts.
- Extend identity governance and control mapping to Non-Human Identities (NHI) and AI/automation workloads using Clutch Security, aligning machine-identity risk with enterprise compliance and audit frameworks.
- Mentor engineering teams and guide global delivery, standardizing implementation practices across hybrid and cloud environments.

Principal Engineer — Optiv

Apr 2024 – Nov 2025

Bengaluru, India · On-site

- Led PAM Center of Excellence initiatives, enhancing framework, procedures, and guidelines while mentoring team members on CyberArk and BeyondTrust.
- Architected and implemented CyberArk Privileged Cloud (ISPSS) to reduce privileged-access risk for enterprise clients.
- Designed CyberArk Identity integrations (SIEM, Entra SSO/MFA via SAML) and Workforce Password Management for a fintech client.
- Implemented Secure Infrastructure Access (SIA) for RDP/SSH session management in place of PSM to achieve Zero Standing Privilege, plus Secure Web Sessions (SWS) for web application access.

Specialist Manager — Deloitte

Aug 2022 – Mar 2024

Sydney, Australia · On-site

- Implemented CyberArk Privileged Cloud (ISPSS) across Dev, Pre-Production, and Production environments for enterprise customers.
- Led a PAM current-state assessment and future-state roadmap for a major Australian bank, defining a multi-year PAM strategy.
- Authored SOPs, design documents, and as-built guides that strengthened the client's IDAM practice.
- Mentored team members through CyberArk CDE-CPC certification and training.

Manager — Senior Architect — EY

Aug 2021 – Jul 2022

Bengaluru, India

- Owned end-to-end design, implementation, and integration of CyberArk and BeyondTrust PAM across on-prem and cloud (AWS, Azure).
- Defined PAM strategy, roadmaps, and project plans; interviewed stakeholders and application owners to scope PAM cycles ahead of deployment.
- Led PAM tool migrations between on-prem and cloud, replacing legacy privileged-credential tooling.
- Delivered SailPoint IIQ development and administration, including custom provisioning rules and root-cause analysis for recurring issues.

ADDITIONAL EXPERIENCE

- Manager, Deloitte (Feb 2021 – Aug 2021), Bengaluru — Identity and secrets-management engagements including HashiCorp Vault.
- Assistant Manager, KPMG Global Services (Oct 2017 – Feb 2021), Bengaluru — Risk governance and privileged/identity project delivery.
- Senior Consultant, KPMG (Sep 2015 – Sep 2017), Bengaluru — SailPoint IIQ, CyberArk, and OpenAM integration (SAML SSO); role engineering, analysis, comparison, and merging using Saviynt; privileged identity management and session recording implementations.
- Deputy Manager, Reliance Communications (Apr 2015 – Aug 2015), Mumbai — CyberArk Vault/PVWA administration, enterprise policy and safe management.
- Senior Software Engineer, Accenture in India (Jun 2014 – Jan 2015), Bengaluru — CyberArk Vault/PVWA onboarding, service-account management, LDAP integration.
- Functional Consultant & Project Engineer, Wipro (Nov 2011 – Apr 2014), Bengaluru — ERP and early identity/security engineering roles.

INDEPENDENT SECURITY RESEARCH

Securing India's National Examinations — A Zero Trust Reference Architecture

- Authored a 30-page independent proposal applying Zero Trust principles to prevent national exam paper leaks (NEET, JEE, CUET) — covering threat modelling, AI-assisted content security, HSM-based paper vaulting, breach-response playbooks, and a fully costed ₹1,419 crore national rollout.

Read the proposal: roshantrivedi.co.in/secure-india-exams

EDUCATION

Bachelor of Technology (B.Tech), Computer Science & Engineering

2007 – 2011

Asansol Engineering College (AEC) • CGPA 7.78
